7. **Old Business**

   a. **Dan Hastings Award** – awarded at the beginning of the meeting

   b. **Public works site Design update Phase II**
The current gravel pit was looked at as a possible site for the new public works facility but it is not considered a decent site to use due to needing fill, retaining walls and would need to be stabilized. When it was excavated it was taken down to the water table and ledge. It also has a 12ft grade to it.

The other site is using land at the RADR facility. The layout is good and there is plenty of acreage to deal with water treatment and keeping buffers of trees. The fields are 1420 ft away and the nearest neighbor is over 535 ft. away. The only other option would be to go and look at all private property that may be available and look to purchase.

Town manager has been questioned about the extra miles the trucks will be traveling. They won’t be driving so many miles that it would justify the purchase of private property.

Additional comments included leaving our dump trucks and equipment out in the weather and the life expectancy is 8 – 10 years. If we get them inside we can get 15 years from the vehicles. The savings from making equipment last longer also needs to be factored into the cost of the project.

If we have to buy land (4 acres for the facility plus what is needed for buffer) there is a cost associated with the purchase. It could add another $100,000 plus to the project. The land is also located on Rt. 117 which is a major thoroughfare.

The consensus is it makes sense to use this piece of land because we already own it and it will work as a site.

The next steps would be to look at the specs of the buildings and costs.

c. Cable TV franchise update

Town manager met with the law firm to discuss our contract. We couldn’t find a current contract on file. The law office reached out to Spectrum and they found we do not have a current contract. Out last contract was in 1999 and Spectrum has been honoring that contract since. We will be included with the other 22 towns to do a density study. We will be setting up a survey for the townspeople to fill out and help us provide information to put together a plan.
